## PROFILE

Electrical Engineering graduate with interest in programming. I took special interest in Front-end development specifically in CSS and JavaScript. I am really intrigued by the UI of websites and I aim to take it to the next Level!

## SKILLS

- HTML
- CSS
- SASS
- JavaScript
- Bootstrap
- Tailwind
- Git & Github
- Netlify

## PROJECTS

### FORKIFY APP

- Forkify is a recipe application with custom recipe uploads
- In this Project I used classes, modules, Promises, Async/await, Parcel, Babel and much more.
- With this Project I learned advance JavaScript features, working with API and much more

### MAPTY APP

- Mapty is a application to track workouts like running and cycling.
- In this project I used external library i-e Leaflet, OOP and much more.
- With this project more than just coding I also learned about project architecture and project planning.

### PONG GAME

- A pong game with multi-player feature.
- In this project I used HTML canvas to draw the graphics and animations.
- With this project I learned about logic building, canvas and game development.
